

«Chemical Park Tagil»

Geography and General Info

- Population of Nizhny Tagil comprises about 390 thousand people.
- Major local and regional industries are ferrous metallurgy, machine building, metalworking and chemical industry.
- The regional and administrative center of Sverdlovsk region – Yekaterinburg – is located in 146km from Nizhny Tagil.

Logistic Connections

Regional highway P353 to Yekaterinburg – 10 km away from Chempark. Access to federal highway M5.

River harbor in Perm – 370 km away from Nizhny Tagil

Federal Sverdlovsk railway road – 300 meters away from the site

Koltsovo Airport in Yekaterinburg – 140 km away from the site

Customs post “Nizhnetagilsky” - 5km away from the site

Site characteristic

- The site is defined in a cadastral passport as "the land of settlements." Encumbrance of land is not registered.
- The site is owned by JSC "Uralchimplast" that a certificate of state registration.
- The main type of permitted use - for the operation of the industrial site with rail tracks, which fully corresponds to the current use of the site.

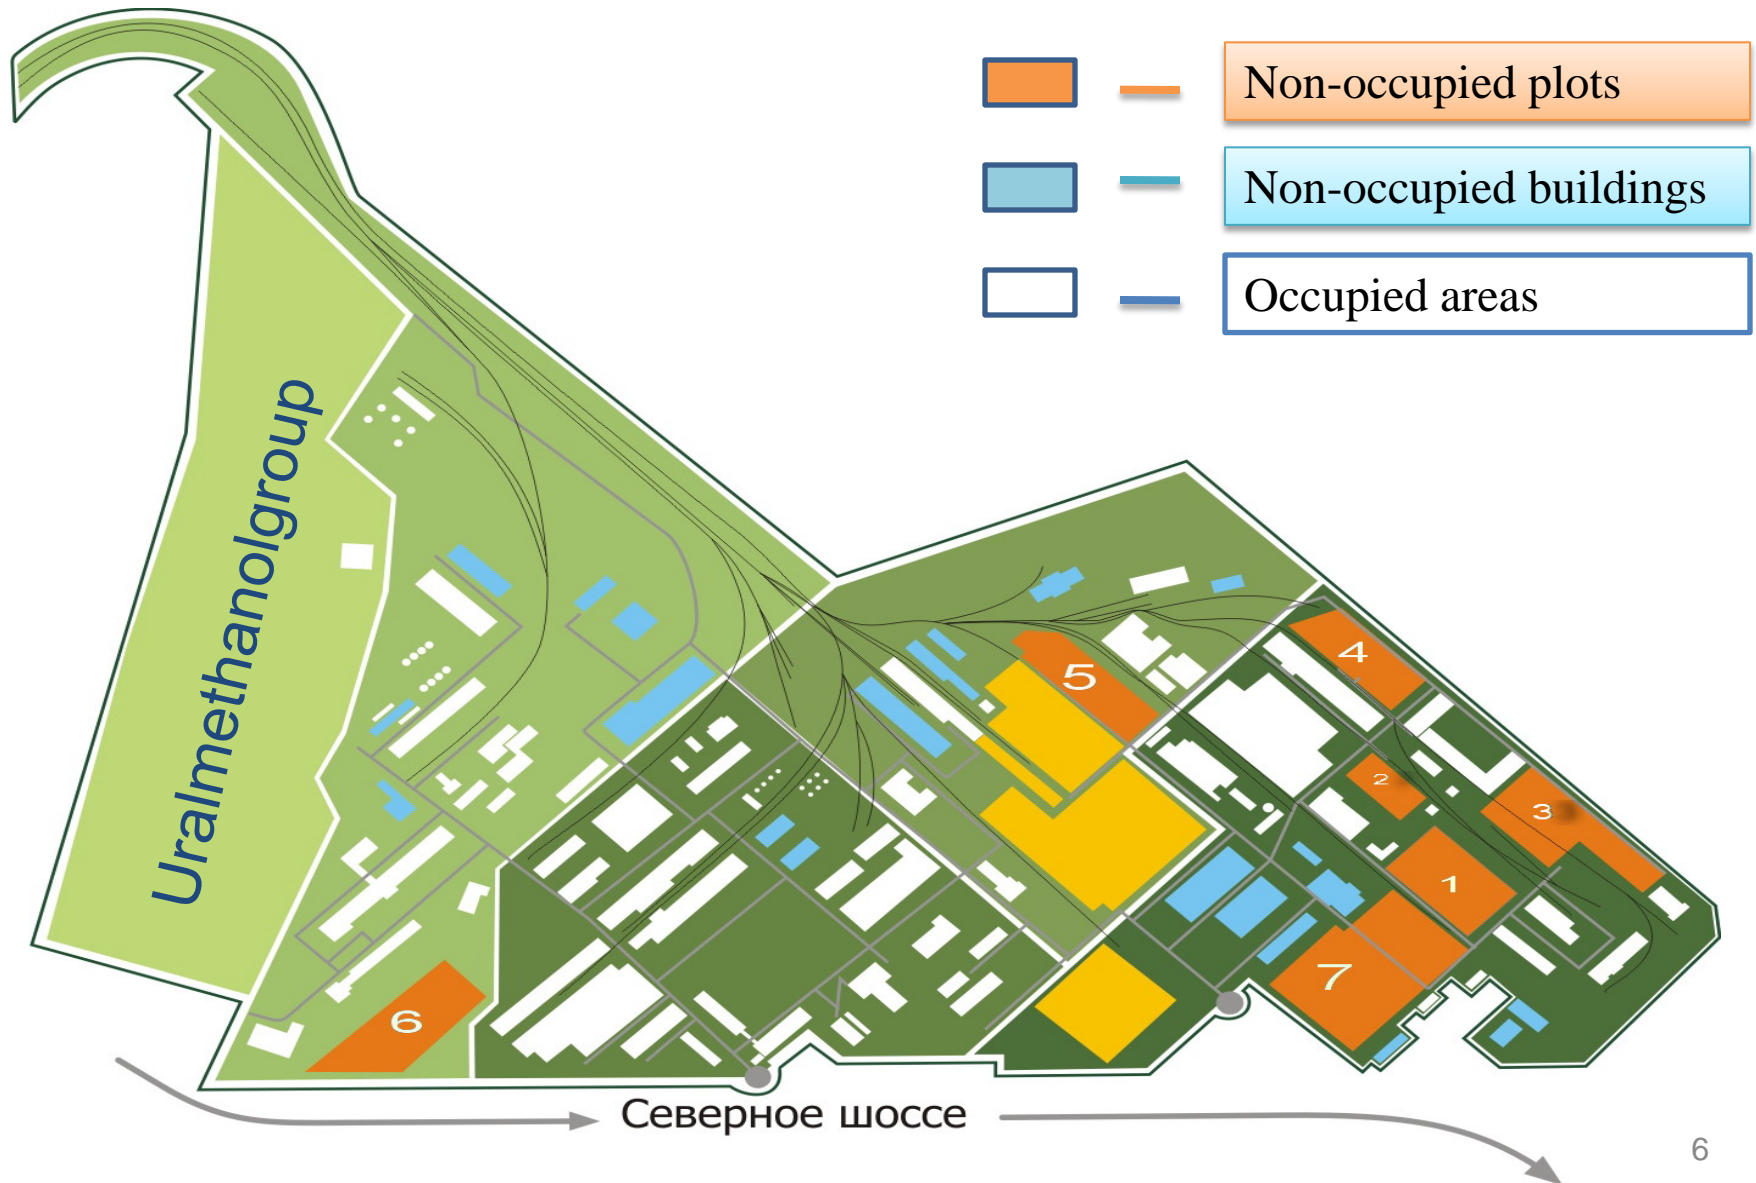

Chempark Infrastructure

- Various energy resources available on site
- Connection to energy resources supply points – free of charge!
- Waste water treatment on owned up-to-date purification system
- Industrial garbage landfill
- Thermal treatment furnaces for chemical runoffs
- On-site truck road system – total length about 35 km
- On-site railway road system – total length about 35 km
- Logistic services and warehouse facilities for raw materials and finished products
- Pipeline connections on site
- Chempark area is under security check

Chemical Park Tagil Area Outline

Energy Resources Available on Site

Resource Type	Max. Total Capacity	Available Free Capacity
Natural gas	40 000 m ³ / h	25 000 m ³ / h
Power supply	52.5 mW	40 mW
Heat supply (steam)	90 Gcal / h	35 Gcal / h
Water supply	1220 m ³ / h	800 m ³ / h
Waste water purification and treatment facilities	5 200 m ³ / h	870 m ³ / h
Nitrogen	200 m ³ / h	120 m ³ / h
Compressed air	7800 m ³ / h	2500 m ³ / h

Major Residents & Projects

Burovik

URALCHIMPLAST **НН**

Ecotechnologii - 2005

Current Projects

Total investment – 80 mln. rub.
Capacity – 2 500 tn/y.
Manufacture of adhesive agents and rust inhibitors.

Total investment – 19 bln. rub.
Capacity – 600 000 tn/y.
Manufacture of methanol

Total investment – 420 mln. rub.
Capacity – 25 000 tn/y.
Manufacture of the foundry & cast resins

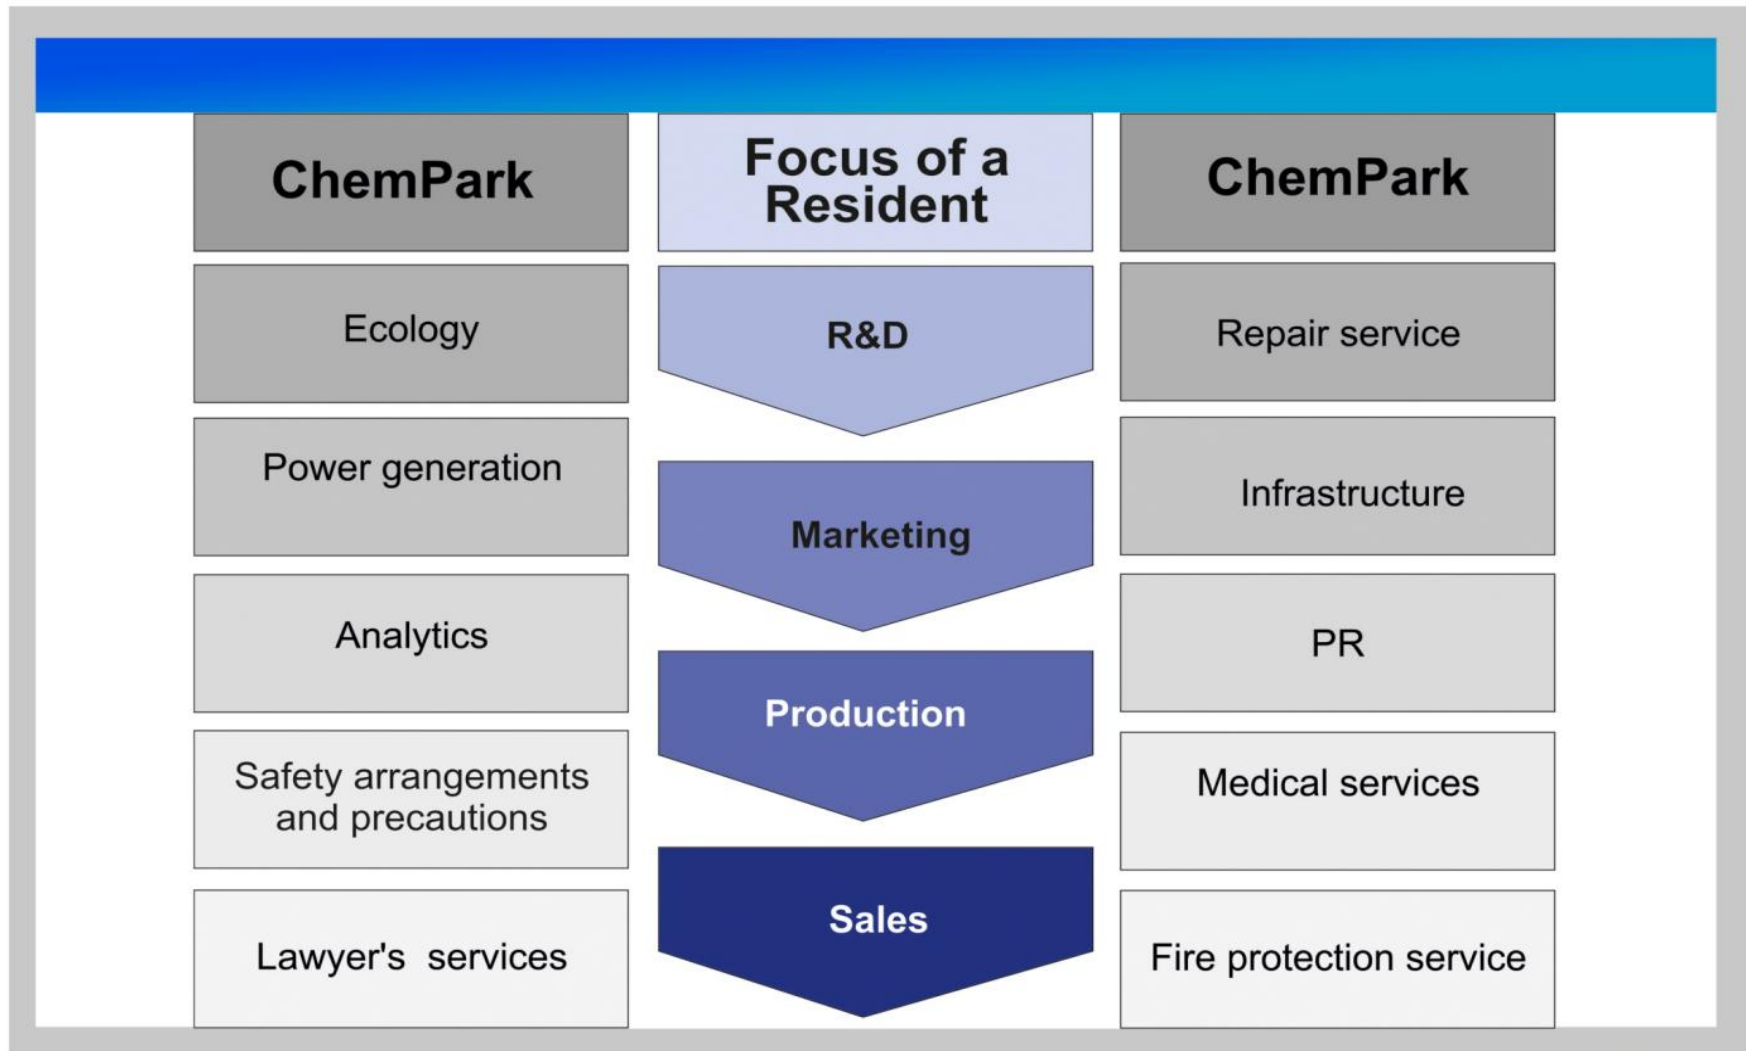

Biological Water Treatment Units

- Total annual capacity equals 49,5 mln. cubic meters
- New line annual capacity equals 5,5 mln. cubic meters

Advantages of ChemPark «Tagil»

Full range of support services for residents

Cooperation with «Skolkovo» technopark

Industrial Trial Units
to be located on the
territory of Chempark
Tagil

Certified
test
and research
laboratory

Financial Preferences & Cooperation

Welcome to Chemical Park Tagil!

CJSC MC Chempark Tagil.

622001, Nizhny Tagil, Sverdlovsk region, Russia.

Severnoe shosse 21, of. 7.
