### **All-Russian Union of Oils and Fats**

**Moscow**, 2015

### **All-Russian Union of Oils and Fats**

was established in 1998, and began its activity in 1999. Now the Union has more than 50 members of oils and fats production and related industries plants, which produce about 80% of Russian vegetable oils and fats. Our members are the main Russian oil manufactures: the holding company "Solar Products", "EFCO", "Yug Rusi", "Nizhny Novgorod Oil and Fat Plant", "Sodrugestvo, "Petrosojuz", Aston" and others. The Union brought the significant contribution to the establishment and development of the oils and fats industry in Russia since its foundation.

The **Union** provides the effective producing opportunity to its members in oils and fats industry.

The **Union** is the leader in technical regulations, and state standardization process in oils and fats industry. It organizes the scientific research in the industry development projects. Russia has become the member of WTO in 2012. Since that time the search for new partners in all countries (Russian partners in commercial relations) became one of the main tasks of the **Union**. We are looking forward to long-term mutually beneficial cooperation with our partners.

The demand for our products is steadily growing in the world. That is why, we can see an increase in production of vegetable oils in Russia (see chart).

### Oil production in the country has doubled in the past nine years

#### Dynamics of production of vegetable oil

# **Oil and fat industry production**

### **Vegetable oils:**

- Unrefined vegetable oils in bulk, packaged (including bottled);

- Refined deodorized bulk, packaged (including bottled), namely:

- Sunflower classical (oleic type) and high oleic oil;

- Soybean (non-GMO);
- Rapes oil;
- linseed oil;
- Camellia sativa oil

## **Oil and fat industry production**

### Margarine products:

- margarine
- fats for the confectionery industry;
- spreads

### Mayonnaises

### Sauces mayonnaise

## **Oil and fat industry production**

### **Toilet soap**

### Laundry soap

Sunflower, soybean, rapeseed meal

## **Products of related industries**

#### **Sunflower seeds**

### Soybeans seeds

#### **Rapes seeds**

### Safflower seeds

### Linseeds

### **Camelina sativa seeds**

Grains and legumes (chickpeas, peas, oats)

### **Branded products businesses Union (not all)**

**Russia** has a great source of raw materials (the increasing in 2-3 times is possible), which allows to grow the production of goods for the citizens and for export (vegetable oil, mayonnaise, margarine, spreads, etc.). As well we can produce special fats for baking, confectionery, dairy industry (produced out of vegetable oils) for domestic market and for export.

### The nearest goals of Union are:

- **to develop** the export opportunities of oil and fat industry, both in vegetable oils, and in downstream products;

- **to improve** the products quality in the oils and fats industry as well as to expand the products range and to develop sales promoting on the Russian and foreign markets;

- **to search** for the new ways of using our new products for food and technical purposes, both within the country and for export.

### **Certificates of products (partial)**
